CAP INDUSTRIES EXHIBITS AT IRRIGATION AUSTRALIA 2010

CAP Industries is pleased to confirm that it will be exhibiting at the Australian Irrigation Conference and Exhibition in Sydney's Darling Harbour next month.

The combined conference and exhibition is the largest event of its kind in the southern hemisphere. Presented by Irrigation Australia and co-hosted by the Cooperative Research Centre (CRC) for Irrigation Futures, this year's event is being touted as "the most comprehensive irrigation-focussed trade exhibition and conference ever seen in Australia".

CAP Industries' Managing Director, Bou Spithoven, is looking forward to the event. "Irrigation Australia 2010 certainly promises to be a highlight for the industry" he stated recently. "Not only does it offer the opportunity to showcase our own solutions, it is a great way to keep in touch with industry developments and market trends."

CAP Industries will be located at stand 156 in Hall 1 of the exhibition.

Irrigation Australia is staged every 2 years at different locations throughout Australia. The theme for this year's conference is **One Water, Many Futures.**
